I was raised and went to school in Bruce Rock through to the end of Year 8, then attending Aquinas College as a boarder until Year 12. After finishing school, I worked at CBH for several seasons as well as various labouring jobs before completing an apprenticeship as a heavy diesel mechanic. Most of my time in this role was completed at various mine sites and civil construction jobs throughout the northwest of the state. I worked in leadership roles from 2009.

In 2013 it was time to come home to Bruce Rock to take part in the running of the family business with my parents and brothers. Since moving home, I volunteer with the VFES, as well as being active in various community clubs like the squash and cricket club.

I hope to use my trade qualifications, business development experience, and leadership skills to help our community make sound decisions and remain a great place to live and thrive for generations to come.
